## Project Description

You are going to develop a single page “About Me” website. You will be using HTML tags and CSS properties that we have learned so far.

The layout of an example single page website will be provided to you. It will be your responsibility to write the HTML and CSS to closely resemble the example single page website. Here are some helpful tips:

- The title tag of your page should be your full name.
- The font used throughout the page will be Helvetica.
- The header tags you will be using are h1, h2, and h3 tags, and h1, h2, and h3 tags should be styled in a different color.
- The <h1> tag should have a shadow.
- Text links should be in a different color other than the default blue/purple. When you hover over the text link, the background of the text link should be a different color.
- Each <div> container should have rounded corners, margin, and padding.
- The background color and border color of your first <div> container should be different than the background color and border color of your second <div> container.
- Use ordered lists and unordered lists inside your <div> containers.
- The font for your text within the table should be Times New Roman.
- The background color of each table row should alternate using only CSS (hint: do not use class modifiers)
- The background color of each table row should change when you hover over it.

- BONUS: Alternate the background color of each table row with three colors instead of two without using class modifiers.
- BONUS: Add a 250px x 250px image to the page. The image file should be stored in the same folder as your HTML and CSS files. Modify the image to appear like a circle using CSS.
- BONUS: Change the unordered list of classes you are taking into a table, but keep the table inside the <div>.

## **Grading**

This project is not a design project. The grading focus of this project will be on:

- Using appropriate HTML tags for your content.
- Using CSS to style HTML content.
- Cleanliness and organization of HTML and CSS, especially code indentation.

## **Turning In Your Work**

Your project must be e-mailed in ZIP format to [bmsilverstein@utep.edu](mailto:bmsilverstein@utep.edu) by Tuesday, February 16 at 7:30pm Mountain Time. Late work will not be accepted. You will receive an e-mail confirmation from me when I receive your project files.
